

Pinnacle Peak Home Services

Q3 2023 Performance Report

Reporting Period: July – September 2023
Prepared by: Sandra K., Operations Analyst
Date: October 14, 2023
Distribution: Leadership Team, Director Chen

This report summarizes Q3 2023 performance across revenue, service delivery, customer satisfaction, and regional operations for Pinnacle Peak Home Services. All figures are in USD unless otherwise noted.

1. Executive Summary

Pinnacle Peak Home Services delivered a solid Q3 2023, with total revenue of **\$261,500** across HVAC, Plumbing, and Cleaning service lines. This represents a **7.2% increase** over Q3 2022 and positions us well for our FY2024 growth targets. HVAC continued to be our highest-revenue service, particularly during the peak cooling season in July and August.

Customer satisfaction scores remained strong, with an overall average rating of **4.1 / 5.0** across all service types. Net Promoter Scores showed particular strength in Cleaning (avg NPS: 53), which outperformed our industry benchmark of 35.

Key area for attention: Plumbing satisfaction dipped in August due to a cluster of late arrivals linked to technician T07 route scheduling. Addressed in Q4 plan.

2. Revenue Summary

2.1 Total Revenue by Month and Service Line

Month / Service	HVAC (\$)	Plumbing (\$)	Cleaning (\$)	Total (\$)
July 2023	\$41,000	\$28,000	\$18,500	\$87,500
August 2023	\$43,500	\$27,000	\$19,200	\$89,700
September 2023	\$40,000	\$26,500	\$17,800	\$84,300

Q3 TOTAL	\$124,500	\$81,500	\$55,500	\$261,500
----------	-----------	----------	----------	-----------

2.2 Performance vs Q3 2022

Metric	Value
Q3 2022 Total Revenue	\$244,000
Q3 2023 Total Revenue	\$261,500
Year-over-Year Growth	+7.2%
Best-performing service line (by growth)	HVAC (+8.1%)
Lowest-performing service line	Cleaning (+4.9%)

Note: Q3 2022 figures sourced from finance system export dated Jan 2023. HVAC growth partially attributed to the new North region technician hire (T03, Marcus Webb) who joined in May 2023.

3. Service Delivery

3.1 Ticket Volume and Completion

A total of **47 service tickets** were completed in Q3 2023, up from 43 in Q3 2022. Completion rate was 96% (2 tickets cancelled by customer, 0 failed completions). Average job duration was 2.6 hours.

3.2 Technician Highlights

Technician	Highlight
T09 – Jenna Calloway	Highest avg rating (4.9) — West region
T12 – Fatima Al-Amin	Zero complaints, all East Cleaning tickets
T07 – Derek Osei	2 late arrivals August (see Plumbing note above)

4. Customer Satisfaction

Survey responses were collected from **186 of 304 completed service calls** (61% response rate) via post-service email. Results are summarized below.

	Avg Score (1-5)	NPS	Industry NPS
	4.0	37	35

	3.8	30	35
	4.6	57	35

Plumbing NPS of 30 falls below the 35 industry benchmark. Root cause: August scheduling issues. Q4 action: route optimization for South region plumbing calls.

5. Regional Performance

	Q3 2023 Revenue	YoY vs Q3 2022
	\$87,000	+9.4%
	\$73,500	+6.2%
	\$68,000	+5.8%
	\$33,000	+7.5%

West region continues to grow off a smaller base. Director Chen has approved exploration of a second West technician for HVAC — to be revisited in Q1 2024 planning.

6. Q4 2023 Outlook & FY2024 Planning Notes

Q4 is historically our lowest revenue quarter (HVAC demand drops post-summer). We are projecting Q4 2023 revenue of approximately **\$245,000–\$255,000** based on booked service contracts and seasonal trend.

For FY2024 planning: Leadership has indicated a target of **15% revenue growth** over FY2023. This would require approximately \$1.24M in FY2024 vs the \$1.08M projected for FY2023. Broken down by quarter, Q3 2024 target would be approximately **\$300,725**.

Recommended priorities for FY2024: (1) Expand HVAC capacity in North, (2) Address Plumbing NPS gap, (3) Evaluate Ottawa pilot expansion based on Q1–Q2 performance.
